

# Partner and Channel Reseller Cloud Telephony Bundled Deals

Inclarity's channel programme offers resellers and agents a leading portfolio of telecommunications products to choose from.

A cornerstone of our portfolio is our hosted telephone service, which is based on best-in-class BroadSoft technology, and which is supported by Inclarity's own resilient and reliable network in the Cloud.

Inclarity also champions a flexible approach to doing business, allowing all resellers and agent to pick and choose the technology solutions that are a best fit for their customer's needs.

This flexibility is supported by a range of bundled deals which offer a variety of services for a single monthly fee.

You can combine Inclarity's different bundled Deals in any combination, and you can also bolt on additional Group and Subscriber services as they are required. Any requirements for additional hardware or new connectivity can also be added easily.

**If you would like to know more then please get in touch with us today.**
